Interview Summary (PTO-413) Paper No(s).

Notice of Informal Patent Application (PTO-152)

Art Unit: 1644

## **DETAILED ACTION**

Claims 1-2 are pending and are under consideration in the instant application.

- 1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- 2. The Abstract of the Disclosure is objected to because it does not adequately describe the claimed invention. Correction is required. See MPEP 608.01(b).
- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112.

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- A. Claim 1 is indefinite and ambiguous in the recitation of "administering a conditional treatment", second line, and "administering an immune blockade treatment" third line. The characteristics and metes and bounds of "conditional treatment" and "an immune blockade treatment" are unclear and indefinite.
- B. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Art Unit: 1644

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horwitz (US Patent NO: 6,447,765) in view of Lynt et al. (Transplantation, 1997, 63, 6, 910-911).

Horwitz teaches a method of transplanting a donor tissue, the method comprising the step of administering a bone marrow cell transplant from a donor to a recipient (see entire document, Abstract in particular). Horwitz also teaches using an immunosuppressive treatment of the recipient (see column 1, line 60-65 in particular). Horwitz teaches that treating the patients and bone marrow cell transplant are done within period of time ranging from 4 to 72 hours. Horwitz also teach conditioning treatment that will reduces the number of lymphocytes but will avoid neutropenia (see coulumn 2 lines 25-60 in particular).

Horwitz does not teaches that a donor is a clinical cadaver.

Lynt et al. teach a method of transplanting a donor tissue from brain-dead organ donor (clinical cadaver) (see entire document, Abstract in particular). Lynt et al. also teach that using cadaveric donors for organ transplantation would be beneficial and of great importance and would provide organ transplantation to those who would have previously been refuses for transplantation (see Abstract in particular).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to apply the teaching of Lynt et al., to those of Horwitz to obtain a claimed method of transplanting a donor tissues, wherein the donor is a clinical cadaver.

One of ordinary skill in the art at the time the invention was made would have been motivated to do so, because using cadaveric donors for organ transplantation would be beneficial and of great importance and would provide organ transplantation to those who would have previously been refuses for transplantation as taught by Lynt et al. and can be used for bone marrow cell transplant from a donor to recipient as taught by Horwitz.

Application/Control Number: 09/855,027

Art Unit: 1644

From the combined teaching of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.

7. No claim is allowed.

8. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which Applicant may become aware in the specification.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskyi whose telephone number is (703) 308-4232. The examiner can normally be reached Monday through Friday from 9:00 AM to 5:30 PM. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-3014.

Michail Belyavskyi, Ph.D. Patent Examiner Technology Center 1600 September 30, 2002.
